(57) Abstract: A method for activating MBMS-bearing service. comprising: a) After authorized, the UE which currently requests receiving MBMS-bearing service sending the information of its MBMS-bearing ability to the SGSN it belongs to; among the other steps, the method includes: b) the said SGSN determines whether it has the required MBMS-bearing ability, if so, it will continue creating the MBMS UE context and terminate the current process; otherwise, it will carry out the step c; c) the SGSN determines whether the MBMSbearing ability of the UE which will receive the MBMS-bearing service is less than the required MBMS ability stored in the SGSN, if so, the SGSN will refuse the request for activating the MBMS UE context; otherwise, the SGSN will continue creating the MBMS UE context. The method would simplify the signal interaction among the respective entities in the network, reduce the complexity of the network, and save the network resource.
